## **Company Profile**

**CAT LABS Pvt. Ltd. is India's leading Security Solutions Company. Innovation and adoption of new technologies has led it to become a market leader. Specializing in virus protection the company's flagship product Quick Heal® with its powerful and uniquely designed VB 100% certified Virus Engine provides maximum protection and delivers comprehensive solution against viruses to its users spread across the globe. Its advance products Quick Heal Antivirus Plus 2009 and Quick Heal Total Security 2009 and advance Exchange Protection 2009 gives protection against all viruses, spam, spy wares, ad wares, coming through your ways of networking including mails. Its firewall along with anti malware gives efficient remote support in real time.**

Incepted in 1993 by the Katkar Brothers it started with a product idea in the security and Anti-Virus domain. It successfully developed an Anti-Virus product and christened it Quick Heal®. In 1995 was incorporated to form CAT LABS PVT LTD to make Brand Quick Heal a strong brand in the IT security field.

In an industry, which has seen very few success stories and overwhelmed by the technical challenges posed by new viruses' everyday, Quick Heal has grown exponentially in the past 13 years. This is evident by its presence in more than 50 countries worldwide and its listing on more than 400 shareware sites and with a growth rate of nearly 100% Year on Year. Over the years we have moved from a simple Antivirus Company, to a comprehensive Security Products Company.

At *Quick Heal®* we have always maintained leadership position in technology, service and support and price performance. It is our this Endeavour had helped us gain national and international recognition and awards like 22 times VB100% , Check Mark Level Two

## **Awards and Recognition**

### **ICSA labs**

Quick Heal Internet Security 2010 suite has achieved prestigious ICSA Labs Anti-Virus Certification on Microsoft Windows XP operating system. The certification adds a new dimension to its products' efficiency and global acclaim. ICSA Labs certification is a high-quality benchmark that verifies the trustworthiness of security products.

ICSA Labs, an independent division of Verizon Business, offers vendor-neutral testing and certification of security products. Enterprises worldwide rely on ICSA Labs to set and apply objective testing and certification criteria for measuring product compliance and performance.

### **Virus Bulletin Award**

Virus Bulletin is an independent British periodical dealing exclusively with virus protection. It regularly tests anti-virus solutions developed for various platforms. Virus Bulletin VB100% award is given to anti-virus products that:

- Detect all In the Wild viruses during both on-demand and on-access scanning in their comparative tests.
- Generate no false positives when scanning a set of clean files.

**Quick Heal still remains the only Indian Antivirus using indigenous Antivirus engine to achieve this award. We have in all 22 Vb-100% awards as on date.** The company has received the prestigious VB 100% award, on all platforms (Windows, Novell, Linux, XP, 2000, 2003, Vista etc.) the most prestigious of awards in the Anti-Virus Industry. It is the only Anti-Virus software from Asia to get VB 100% certification for its Linux based Anti- Virus.

**Quick Heal**

Enjoy Your Freedom In Networking With Quick Heal

### **Checkmark Level 2 Certification**

One of the chosen little Anti-Virus software's to get International acclaim Quick Heal® has become one of the first Anti-Virus software's from Asian Subcontinent to bag the prestigious "Checkmark Certification Level 2" by West Coast Labs U.K.

### **OESISOK certification**

OESISOK certification from OPSWAT certify that Quick Heal AntiVirus Version 9.50 is correctly installed on all supporting Operating System. It is not reported as malware and has a high ability to detect viruses and malwares.

Quick Heal AntiVirus has received Antivirus + Antispyware OESISOK™ designation from OPSWAT.

[www.softsia.com](http://www.softsia.com)

[www.softlist.com](http://www.softlist.com)

“Quick Heal” India’s leading Antivirus bringing smiles on millions of faces

**Quick Heal®**

**Enjoy Your Freedom In Networking With Quick Heal**

## **Advantages of Quick Heal®**

**Quick Heal® offers lethal combines of Reactive and Proactive technologies to keep viruses and other malware out from the systems.**

It provides e-mail, Network, Intranet and other online protection services. Needless to say, its Virus Bulletin (VB100) award winning and Check Mark certified virus scan engine eliminates 100% **In - the - Wild** viruses in all types of files, compressed archives, and mailboxes both On-line and Off-line.

What distinguishes Quick Heal® from its peers is its design philosophy, which is User friendly, Futuristic in nature to counter the most dangerous malwares. This ensures that the users get a stable, reliable and consistent protection of the highest standard while exploring every corner of the cyber world not only from the known virus but also against unknown threats.

We are the leaders in providing prompt and easily accessible technical support through email, telephonic and chat. Regarding technical intricacy we are rated as best for unknown malwares (DNA, sensor, heuristic), Real time protection for unknown viruses, low on system resource, Optimum balance between performance and security. Moreover we have small and incremental updates (2-6 times per day), free upgrade policy, and Flexi licensing policy. Our user friendly interface makes easy for customers to operate.

“Quick Heal” India’s leading Antivirus bringing smiles on millions of faces

## **Quick Heal® Features**

- **DNA Scan Technology**

We employ the revolutionary DNA Scan technology which is designed and developed by us to counter the unknown threats. This technology employs deep code inspection and has been a great success in countering new and unknown viruses.

- **Quick Heal® Active Sensor**

Sensor proactively tracks action of new Worms, Trojans, Back doors which amount to 50% - 60% of the total prevailing threats. Quick Heal's proactive approach saves your organization a good amount in costly repairs and lost productivity. Sensor tracks the action of new Worms, Trojans and Backdoors - so on every boot it checks if new activities are found and ensures that the threat is arrested immediately well before the virus creeps into your machine.

- **Quick Heal® Messenger**

Messenger provides protection through information and is a trusted link of communication. Messages from Quick Heal® are never sent by e-mail, as "Mail Spoofing" has made it possible for persons as program to send messages you can believe come from Quick Heal®. So you get a flashing "lamp" in the system tray whenever there is a message. It's when you see such a Blinking lamp that you know you got a message. If it's a Red lamp - then it's a virus alert, Green for Updates & General messages, Yellow for Hoaxes Alert.

- **Smart E-mail Protection**

Quick Heal's E-mail protection is sensible to your mails. While the de-facto standard of mail protection is to wipe out the infected mail completely we have introduced the concept of

selective removal. You will love its built in intelligence to just remove the infected parts of the mail. Quick Heal<sup>®</sup> scans and supports all e-mail and MIME format.

- **Smart Memory Scanning**

Quick Heal<sup>®</sup> drills down to locate and inform about the file, which had lead to infection along with the virus name. Further, it automatically kills the possible viruses in the memory and informs in plain text the action suggested. No confusion, just follow the instructions.

- **Emergency CD**

User can create their own emergency bootable CD that will help them to clean boot in Windows PC, scan and clean all the drives including NTFS partitions. This helps in cleaning badly infected PC from file infecting viruses which cannot be cleaned from inside window.

- **Native Boot scan**

You can schedule Native Scanning of your PC at next boot which will scan and clean all drives at boot time before Windows is completely loaded. This will help you in detecting and cleaning even the most cunning rootkits, spywares, special purpose Trojan and loggers.

- **Quick Heal Firewall Professional 3.0**

Locks hackers and thieves out of PC and delivers total protection against known and unknown internal and external network based attack. Quick Heal Firewall Professional 3.0 is being powered by Agnitum Outpost, Russia.

- **Content Filter**

Blocks access to unwanted websites on your PC based on the contents of the website.

- **MS-Office Protection**

Quick Heal® seamlessly integrates with MS Office 2K/XP to provide 100% protection. It ensures that the viruses are dug out of embedded files also.

- **Complete and Small Upgrades**

Quick Heal® upgrades are script based single point and complete. Quick Heal® intelligently downloads appropriate definition file and upgrades the software without the need to restart. Upgrade scheduler is flexible and can be configured the way the user wants it. Moreover the upgrade file either can be taken from the Internet or Network Drives.

### **Antirootkit**

Detects and cleans root kits proactively by doing deep system scan. Scans running processes, registry and file system for any suspicious root kit activity that is kept hidden in the system.

### **PC 2 Mobile Scan\***

Unique feature and is patented technology in India and USA. Scans and clean viruses and spy wares from your mobile phones, PDAs and smart phones by just connecting it to your PC.

### **Quick Heal Antimalware**

### **Quick Heal Internet Security 2010**

**Lighter | Faster | Smarter**

#### **System Requirements : Platforms**

- Windows 2000 Professional
- Windows XP Home/Professional
- Windows XP Professional 64-bit
- Windows Vista Home Premium/Home Basic/Business/Enterprise/Ultimate (32bit and 64-bit)
- Windows 7 Home Premium/Home Basic/Starter/Professional/Enterprise/Ultimate (32-bit and 64-bit)

“Quick Heal” India’s leading Antivirus bringing smiles on millions of faces

**AntiVirus**

The powerful virus detection engine of Quick Heal AntiVirus scans and removes viruses, worms, trojans and many other threats that may try to sneak into your system through removable drives, email attachments and Internet downloads.

**AntiSpyware**

Spyware is malicious software that is installed on the system without the user's knowledge to gather personal information of the user and to monitor the critical information such as user name, passwords, bank account details, credit card details etc. The AntiSpyware feature blocks spywares before they get installed on your PC. It also protects your privacy by detecting and cleaning spywares, and blocking their activities of identity theft automatically.

**AntiMalware**

A new advanced malware scanning engine scans registry, files and folders at lightning speed to thoroughly detect and clean Spywares, Adwares, Roguewares, Dialers, Riskwares and lots of other potential threats in your system.

**Anti-Rootkit**

Detects and cleans rootkits proactively by doing deep system scan. Scans running processes, registry and file system for any suspicious rootkit activity that is kept hidden in the system.

**Autorun Protection**

Malwares that spread by exploiting the autorun feature of removable devices are on the rise, and USB drives (memory stick, flash drive, portable hard drive) have now become carriers of autorun malwares. Autorun Protection is a new feature from Quick Heal that safeguards your system against such malwares by disabling the autorun feature.

**Browsing Protection**

The Browsing Protection feature protects your computer from threats occurring through malicious websites.

**Self Protection**

Self Protection is a new feature which will protect Quick Heal files, folders, configurations and registry entries against malicious activities, and also from getting tampered.

**Entertainment Mode**

Suppresses prompts across all Quick Heal modules and reduces system load which makes activities like playing games, watching movies or presentations uninterrupted without compromising the security of the computer.

**Quick Heal**

**Enjoy Your Freedom In Networking With Quick Heal**

**AntiPhishing**

Automatically scans all accessed web pages for fraudulent activity protecting you against any phishing attack as you surf the internet. Prevents identity theft by blocking phishing websites. So you can shop online, use Internet banking and surf the websites safely.

**AntiSpam**

Blocks spam mails, phishing attack mails, junk mails and porn mails before they reach your inbox.

**Firewall**

Quick Heal Firewall Pro acts as a wall between your system and hackers. Powered by Agnitum Outpost, it keeps hackers at bay by making your system invisible on the Internet. Delivers total protection against known and unknown internal and external network based attacks.

Autorun Protection is a new feature from Quick Heal that safeguards your system against such malwares by disabling the autorun feature.

**Browsing Protection**

The Browsing Protection feature protects your computer from threats occurring through malicious websites.

**Self Protection**

Self Protection is a new feature which will protect Quick Heal files, folders, configurations and registry entries against malicious activities, and also from getting tampered.

**Entertainment Mode**

Suppresses prompts across all Quick Heal modules and reduces system load which makes activities like playing games, watching movies or presentations uninterrupted without compromising the security of the computer.

**AntiPhishing**

Automatically scans all accessed web pages for fraudulent activity protecting you against any phishing attack as you surf the internet. Prevents identity theft by blocking phishing websites. So you can shop online, use Internet banking and surf the websites safely.

**AntiSpam**

Blocks spam mails, phishing attack mails, junk mails and porn mails before they reach your inbox.

**Firewall**

Quick Heal Firewall Pro acts as a wall between your system and hackers. Powered by Agnitum Outpost, it keeps hackers at bay by making your system invisible on the Internet. Delivers total protection against known and unknown internal and external network based attacks.

**PC2Mobile Scan**

Virus attack is not just limited to PCs or Notebooks. In the fast paced mobile world, where people access the Internet using their mobile phones, virus attack on mobile phones is now another outlet for cyber criminals to spread malicious programs. Quick Heal Total Security provides the PC2Mobile Scan feature where you can scan, detect and delete malwares, viruses and spywares from your mobile phones.

PC2Mobile Scan supports following mobile phones:

Apple iPhone, LG, Motorola, Nokia, Panasonic, Samsung, Sharp, Siemens, Sony Ericsson, HTC, I-Mate, HP, O2 and all the Windows Mobile phones.

Support for new mobile phones is regularly added. For detailed list of all supported phone models please visit <http://www.quickheal.co.in/pc2mobile.asp>

**Data Protection**

Data Protection prevents unauthorized copy of confidential or sensitive data from your PC. It blocks access to pen drive/CD writer or other USB storage devices from your PC. Using this feature, neither the system's data can be copied to the removable drives nor the data from outside (removable drives) be copied to your system.

**Secure Delete**

The Secure Delete feature permanently erases files from the hard drive, as opposed to the normal delete procedure, making it unrecoverable.

**Disk Cleanup**

You have created a new folder, but forgot to add files in the folder. You created a shortcut to a location, and after a few days deleted the location, but not the shortcut. You've been surfing the net for quite some time now and the temporary Internet files have accumulated in the respective folder. All of these are invalid files or junk files that clutter your system hard drive and affects system performance. With the Disk Cleanup feature you can remove such clutter to free up disk space that can be used for other applications or for improving system performance.

**Registry Cleanup**

It cleans invalid and junk entries from system registry and boosts system performance.

**Duplicate File Finder**

Deletes duplicate files of pre-defined file categories, by searching for duplicate files on your computer. It conserves disk space by removing redundant files.

**Defragmenter**

It defragments page-files, and registry hives that are used by applications, to improve the performance of the system.

## **Quick Heal PCTuner 2.0**

**Tune your PC for 100% Performance**

### **System Requirements**

- Microsoft Windows XP (32-bit or 64-bit) with SP 1 or above
- Microsoft Windows Vista (32-bit or 64-bit)
- Microsoft Windows 7 (32-bit or 64-bit)
- Cannot be installed on Server Operating System

### **Minimum Hardware Requirements**

- 256 MB or higher RAM
- 100 MB of free hard disk space
- DVD-ROM/CD-ROM drive

#### **For Microsoft Windows XP**

- 300 MHz or higher processor

#### **For Windows Vista and Windows 7**

- 1 GHz or higher processor
- DVD or CD-Rom drive

### **Auto Cleanup**

Cleans system clutter by deleting invalid and unwanted junk files, invalid registry entries, traces of Internet history and traces of popular daily used applications. Ideal for novice users who can save time by performing Auto Cleanup rather than performing individual cleanup activities one after the other.

**Disk Cleanup**

Finds and removes junk files such as temporary files, Internet cache files, invalid shortcut files, garbage files and empty folders from the hard disk to create space that can be utilized by other applications and to improve system performance.

**Registry Cleanup**

Removes invalid registry entries from the system that have appeared due to improper uninstall, non-existent fonts, etc., to boost the performance of system memory.

**Traces Cleanup**

Removes traces of browsing history from browsers like Internet Explorer, Chrome, Safari and Opera. Also removes MRU (Most Recently Used) List of popular daily used applications like MS Office, Adobe Acrobat Reader, Windows Media Player, WinZip, WinRAR and many more. It also cleans Browser Cookies, Saved Passwords and Auto-Complete Form entries to ensure that user privacy is not breached.

**Duplicate File Finder**

Deletes duplicate files of images, mp3/mp4 or other music files, movie, document and many other popular daily used files which generally takes a lot of hard disk space. It searches for duplicate files at locations specified by the user. The user also has the option to specify exclusion paths for search of duplicate files. It can also be configured to delete duplicate files using conventional method or Secure Deletion methods.

**Secure Delete**

The Secure Delete feature, deletes the user specified files and folders permanently from the hard disk making it unrecoverable even using a Recovery Software. You can delete your critical and confidential data using Secure Delete. It provides three types of deletion methods, including the Department of Defense standard of deletion.

**Defragmenter**

Performs defragmentation of vital files, such as page-files and registry hives for improving application response time and registry access time. Page-file fragments are stored at different locations which can result in poor system performance or poor system response time. Registry Defragmenter clubs all page-file fragments into one contiguous chunk to improve the system performance.

**Restore**

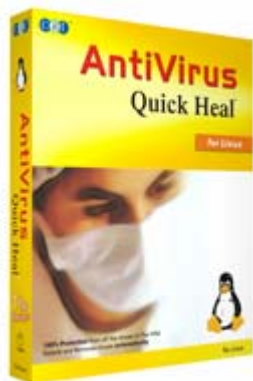

Restores items that were cleaned or deleted during Registry Cleanup or Disk Cleanup. By default, a backup is taken whenever Disk Cleanup or Registry Cleanup is performed. This helps users to restore earlier system settings, if any change in system behaviour is observed after Disk Cleanup or Registry Cleanup.
